

DIY FACE MASK WITH FILTER OPTION

CUT A
(Inside Layer)

A pattern for the inside layer of a face mask. It is a rectangular shape with rounded corners and a curved bottom edge. A dashed line indicates the cutting path, which is slightly inward from the solid outer line.

CUT B
(Outside Layer)

A pattern for the outside layer of a face mask. It is a rectangular shape with rounded corners and a curved bottom edge. A dashed line indicates the cutting path, which is slightly inward from the solid outer line. Two small black dots are placed on the left and right sides of the mask, connected by a horizontal dashed line, indicating the placement of a filter.
